N2 GENERATOR RACK

The MicroPROGEL High Purity (HP) Nitrogen Generators are engineered to transform standard compressed air in to a safe regulated supply of 99.9995% pure nitrogen. Typical applications include GC make up gas and carrier gas, including ECD (Electron Capture Detector), solvent evaporation, DSC (Differential Scanning Calorimeter) and virtually any analytical instrument that requires a small flow of ultra high purity nitrogen.

Main applications

- Produces a supply of high purity Nitrogen 99.9995% for GC application
- TOC applications including combustion, UV persulfate and wet oxidation sampling techniques
- make-up and carrier gas applications including ECD

Main advantages

- Generates Nitrogen on demand from external compressed air
- Designed to run 24 hours a day
- Eliminates dangerous Nitrogen cylinders from the laboratory
- The ZN2 series is equipped with a Catalyst oven to remove Hydrocarbons (as methane)
- Smart control of the flow of inlet air, it is function of the real flow of nitrogen used by the application
- Minimum maintenance with an annual filter change
- USB/RS232 ports to remote the system anywhere in the world
- Low power, low noise, low maintenance
- Ultra fast start-up time
- Fast purity (10 ppm in less than 3 hours)
